

>> Preventive Maintenance

Customer

Kuwait Ministry of Electricity and Water

Customer Situation

The customer needed preventive maintenance carried out on their installed GIS substations in Kuwait ensuring the Ministry of Electricity and Water (MEW) the highest network reliability and availability.

Transmission and distribution equipment reliability in this part of the world, where electric needs are constantly increasing, is very important for MEW. They required a solution to keep their installed park at 100%.

AREVA T&D Solution

For many years, AREVA T&D has maintained close ties with the Kuwait Ministry of Electricity and Water to help and to advice on preventive maintenance solutions.

AREVA T&D Service, through its dedicated Local Service Unit in Kuwait, handles the regular preventive maintenance on 51 300/132 kV gas-insulated substations (GIS).

For more than 45 years, preventive maintenances (type M2) have been regularly carried out on this equipment. Recommended and worn parts are supplied and/or replaced on the substations whenever necessary.

Alternatively to regular preventive maintenance, AREVA T&D also proposes Long-term Maintenance Contracts with additional options.

Customer Benefits

- Increases GIS life time
- Increases availability
- Helps prevents major failure
- Worldwide experience and know-how from AREVA T&D
